

# UNDERGLAZE

## CESCO UNDERGLAZES

Cesco Underglazes are intermixable (except for No.17 Orange). Suitable for most earthenware bodies. Best results will be obtained by firing to 1100°C under Clear Earthenware Gloss Glaze. Most underglazes will fire to stoneware temperatures with some loss of colour intensity. May be fired on greenware or bisque either under or over glaze.

Available in 100 ml, 500 ml, 1 ltr, or 5 ltr on firm order.

CESCO UNDERGLAZES	
<b>GROUP 1</b>
